Sling Bag REFLECTIVE

Compact bag with practical organisation options.

All Hi-Vis products meet important procurement criteria, including ergonomics, durability and sustainability. The highest level of quality and functionality meets sustainable materials made from recycled PET bottles -protecting both employees and the environment.

The Sling Bag REFLECTIVE has a large capacity to keep everything you need organised and within easy reach. The discreet reflective stripes on the bag increase visibility in poor light conditions or darkness. For durability and protection of valuables, the sturdy sling bag is made from high quality materials.

The intelligent compartmentalisation offers space for everything from tablets to personal items. The padded fit-all compartment protects tablets up to 12.9", while the hidden compartment made from antibacterial material on the back of the bag offers space for personal items and a face mask.

The front compartment offers space for accessories such as a smartphone or power bank. The shoulder strap is adjustable in length and side for a personalised fit, while the practical carry handle ensures versatile handling. The outer fabric is water resistant according to EN ISO 4920, Level 4.

Breathable padding on the back and shoulder ensures air circulation and carrying comfort. The velcro area allows the bag to be personalised with a name or logo patch.
