Statement of Food contact Compliance No. 277/400000199/2025/ST_rev1 02 February 2026

Based on the analytical results of selected tested sample and its declared composition:

For EU, the tested sample meets the requirements of above-mentioned regulations and/or recommendations and can be considered suitable for use in high temperature applications (including baking and microwave use). Tested sample can be considered suitable also for long term storage of dry foods and freezing temperatures down to -20 °C.

For USA, the tested sample meet the general requirements of CFR 176.170 & 176.180 and can be considered suitable to direct food contact in different applications in condition of use A (High temperature heat-sterilized (eg., over 212 deg.F) and condition D (Hot filled or pasteurized below 150 deg.F) defined in section C Table 2.

Overall based on the analytical results and review of the declared composition, the tested sample can be considered safe for use in the applications mentioned on page 1. Any change to the composition, manufacturing process, or any update to current legislation and/or recommendation may require to re-evaluating this statement.
