		Revision Date: 30.06.2021
		Page: Page 1 of 1

We herewith declare that the product: 00110216, FS197021- 911243 **Microwave Dish Cover 26CM**, and possibly contained plastic component(s): **PP** are in compliance with the provisions of regulation 10/2011/EC and regulation 1935/2004/EC, in particular article 3, 11 (5), 15 and 17, in their currently valid versions. The product and the materials used are manufactured in accordance with the provisions of the GMP regulation 2023/2006/EC.

When used as specified, both the total migration levels as well as the specific migration values are below the applicable regulatory limit values.

Testing is conducted:

- in accordance with article 17 and 18 of regulation 10/2011/EC in combination with Annex V

The materials and raw materials used are in compliance with the provisions of regulation 10/2011/EC.

☒ The a.m. product or component does not contain any monomers or additives, or any other restricted substances added during production with regard to SML, SML(T), QMA, etc. („Dual Use“).

☐ The following restricted substances and/or substances with specifications are used in a.m. product or component. (also Dual Use substances acc. 10/2011/EU, annex IV, article 7 with specification of the no. of the legislative act in the field „Dual Use“)

☐ Usage of additional SML-relevant substances – Information is only provided by the manufacturer to neutral third parties (e.g. testing laboratory)

Specification of the intended use or restrictions:

- Type/types of foodstuffs which are intended to come into contact with the material (**PP**):
 - o All types
- Type/types of foodstuffs which are NOT intended to come into contact with the material:
 - o N/A
- Conditions for use such as duration, temperature of treatment/storage during contact with the foodstuff:
 - o Microwave safe product, 100°C, 2 hours
- Ratio between the surface area coming in contact with the foodstuff to volume, which was applied for the conformity assessment of the material or article:
 - o Surface area : volume : 0.76dm²:127ml

Functional barrier made of plastic material (details acc. 10/2011/EC, annex IV, art. 9)

- no existent
