

Odor control

Lets the air in, keeps smells out

Product overview

NOSA odor control is a discreet and effective nose protection against bad smell which can be used up to 8 hours. The unique design enables the user to breathe normally through the product while at the same time reducing bad smell with a fresh menthol fragrance.

The product is used by thousands of healthcare professionals, EMS and police across EU and North America to improve the working conditions in smelly situations. NOSA odor control was developed by a Swedish nurse in 2016 and is today still manufactured in Sweden.
