Gloss Adhesive Back Laminating Pouches 200 Mic (2X100) A4

Description

Excellent gloss,high transparency laminating pouch
Good moisture barrier and chemical resistance
Great for making signs and stickers of many kinds :building maps,point of sales graphics,rules and regulations,and much more

Application

Water, grease and dirt resistant for excellent document protection
Adhesive backed for fixing to folders, doors and walls etc

Instructions for use

Before use, please make sure your laminator is preheated to the recommended temperature (usually 100–130°C, depending on your machine model).
Insert the document or item smoothly into the laminating pouch, leaving a small margin around the edges.
Place the pouch with the sealed edge first into the feeding slot of the laminator.
The machine will automatically pull the pouch through. Wait until the laminated item comes out completely from the other side.
After laminating, place the item on a flat, clean surface to cool down.
For best results, avoid wrinkling, folding, or overfeeding multiple items at the same time.

Logistic datas

Product: 100pcs / pack

Box: 10 packs (1000pcs)

Technical specifications

Material: PET ,PP,EVA

Size： A4 (216*303mm)

Thickness per side : 100mic

Eco friendly gesture

With GRS certificate
Packing is fully recyclable
